MEMO FOR: Fine Arts Commission

FROM: Exterior Fine Arts Committee

SUBJECT: Placement of Picnic Tables and Benches

In response to tasking for recommendations on the placement of picnic tables and park benches throughout the headquarters compound, the Exterior Fine Arts Committee forwards the following suggestions, accompanied by a crude diagram on p. 3.

Picnic Tables

Generally speaking, employees have already placed picnic tables where they want them, and the result is not unsightly. However, the tables around the entrances and other areas outside the cafeteria courtyard are in poor condition -- twisted out of shape, faded, etc. -- and require replacement. We recommend that new movable tables be purchased and installed as follows:

- Between Northeast and Northwest entrances (15-20 benches);
- Outside the South entrance, across the street and to the left (about 10 benches)
- o At the motor pool and powerplant, possibly using the best of the benches being replaced.

In addition, we recommend that existing tables in the cafeteria courtyard be supplemented by outdoor cafe type tables under the eaves on the decks over the loading dock on each side of the cafeteria. This area is easily accessible from the cafeteria, and the north side could be used for visitors as well as employees.

Benches

The Committee recommends that Victorian-style wood and wrought iron benches be placed at the rate of three per one-tenth mile along the sidewalks around the buildings, as follows:

- o Along the main road in front of the building in front of the grassy areas, and partly along the north road to West lot.
- o Along the walkway through the woods from South lot to Southwest entrance.

If a decision is made to purchase benches, the Committee will be happy to make recommendations on their placement to take advantage of the scenery. For example, in one area placement of a bench in the wrong direction furnishes a view of the powerplant that we would like to avoid in favor of a view of the new building.

All members felt that the park benches would be particularly useful in providing options to escape the overcrowed conditions in the old headquarters building to just relax for a few minutes. One member even said that on several occasions he would have liked to have had a place to sit, as most major decisions on his career have been communicated to him on walks outside the building. Therefore, we recommend that money be found to place benches on the walkways immediately outside the exits.
